ART

James Turrell once said, "Light is not so much something that reveals, as it is itself a revelation." As much as light is important to Turrell, art is Fari Island's primary vehicle of revelation to the world and all its nuances, most prominently with a Skyspace installation - Amarta (2021) - by Turrell himself.

This autonomous structure explores space and the light that inhabits it. Turrell asks that we also inhabit the space and explore our perception of form. Under the Maldivian sun, the aperture focuses on our senses on the pulse and purity of nature.
