Spanning the entire fourth floor, the 1,400-square-metre wellness sanctuary offers a complete wellness journey beyond the traditional hotel spa experience. The space features carefully selected HealthTech, including cryotherapy, hyperbaric oxygen and hydrogen therapy, infrared saunas, and red-light therapy—each chosen to promote relaxation, enhance overall wellbeing and support vitality. Private spa treatment suites, fully-equipped fitness centre, versatile yoga studio, and tranquil indoor pool with stunning views of Osaka Castle complete this comprehensive wellness offering.

HealthTech: A Mindful and Innovative Approach to Wellness

Patina Wellness introduces thoughtfully selected HealthTech therapies to Japan's luxury hospitality landscape, reflecting the brand's commitment to delivering transformative luxury experiences. Guided by specialists trained in advanced therapeutic technologies, each treatment is tailored to address individual wellness goals.

- Cryotherapy Cold Therapy: A cryotherapy is a refreshing and energising experience. This quick and convenient 3-minute session is an effective way to rejuvenate and is particularly popular for post-workout recovery.
- Hyperbaric Oxygen & Hydrogen Therapy: This innovative technology blends oxygen and molecular hydrogen to support the body's natural balance and maintain healthy oxygen levels.
- Infrared Sauna Heat Therapy: Uses specialised heaters that emit Far Infrared radiation, providing sunlight-like warmth without harmful UV rays. This gentle heat penetrates the body, inducing therapeutic sweating and deep relaxation.
- Red Light Photo-biomodulation Therapy: Low-level red and near-infrared wavelengths stimulate cellular renewal, enhancing skin appearance and firmness while offering a calming therapeutic experience.
